NEW DELHI 3 (INDIA); The 1st May, 1950. S. P. JAIN,

for Registrar General, India.

NATIONAL SAVINGS ERTIFICATES

Are now available in three different series, maturing after 5.7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the amain-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 8th April, 1950

In cases of towns where there have been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

Explanation of symbols used :—B.=Births; B. R. =Birth rate; C.=Cholera; S.=Smallpox; P.=Plague; F.=Fevers; D.D.=Dysentery & Diarrhos; R.D.=Respiratory diseases; M.D.=Maternal deaths; D.R.=Death rate; I.D.=Infantile deaths (included in total deaths).

REMARKS

The flyures of births and deaths shown in this statement for the week ending the 8th April, 1950 relate to 181 towns with an estimated population of 24,195 thousands. The total number of towns is 231 and their population is 28,352 thousands. Thus 78% of the total number of towns representing 85% of the total population is convered in this statement. The numbers of births and deaths recorded in the statement, were 12,037 and 9,138 representing birth and leath rates of 25.9 and 19.6 per thousand of population respectively.

(A) States—(Parts A and O): —The data here relate to 161 towns with an estimated population of 21,527 themsands. Information about Assam and Bihar could not be included. The total number of towns is 199 and their population is 24,599 thousands. Thus 81% of the rotal number of towns representing 88% of the total population is covered. Fast an analysis of births and deaths recorded in these towns were 10,749 and 8,301 representing birth and death rates of 26.0 and

20.1 per thousand of population respectively. The table at the end gives the position by states.

The towns of Malignon and Nasik in Bombay recorded high death rates of 73.8 and 55.5 per thousand of population respectively. In Malignon, the high death rate was largely like to deaths from fevers and smallpox but the high death rate in Nasik dees not appear to be due to any one of the specified causes.

(B) States—(Part B):—The data here relate to 20 towns with an estimated population of 2,663 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 63% of the total number of towns representing 71% of the total population is covered. In a numbers of births and leaths recorded in these towns were 1,288 and 837 representing birth and death rates of 25.1 and 16.3 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
